By letter dated March 3, 2021 the Nuclear Regulatory Commission (NRC) determined the performance at Grand Gulf Nuclear Station (GGNS) was within the "Degraded Performance" column of the NRC's Reactor Oversight Process (ROP) Action Matrix (ML211055A008). As a result, the NRC announced its intent to conduct a supplemental inspection in accordance with Inspection Procedure 95002.

The same letter stated that the NRC would schedule the inspection after GGNS notified the NRC of its readiness. This letter serves as notification of GGNS' readiness for the NRC to perform the supplemental inspection.

This letter contains no new commitments. If you have any questions or require additional information, please contact Jeff Hardy at 802-380-5124.
