Subject: [External_Sender] RE: [External] Exemption request for emergency drill

How do you prefer we handle the issue. I could submit a revised request or would this be more of a RAI process? Since there is a 60 day submittal requirement for the graded drill I would like to have a response by July 1 to give me time to plan and meet my submittal requirements for a fall drill if needed. The 24 Hour request would be preferred by the end of September before we start work in the Feed Materials Building. I know you have a full schedule so if these are not realistic just let me know what works for you.

Thanks,

Sean Patterson

Subject: [External] Exemption request for emergency drill

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender **and** know the content is safe.

I took a look at the request you sent for an exemption for covid relief for the 2021 emergency drill. However, the request did not include a discussion of the findings related to specific exemptions in 10 CFR 40.14. We still need to do an evaluation against those standards in order to be able to grant an exemption even though it is for covid relief. I would also appreciate if you could also provide a need date for scheduling purposes. Please let me know if you have any questions. Thanks.

David Tiktinsky
