Dear Mr. Viola:

Enclosed is Amendment #4 to Radioactive Material License No. 165-435-1, with the changes printed in **bold letters**. This amendment renews your license.

Please read the license carefully as you will be responsible for its contents. Your operations will be subject to routine inspections by the Agency for compliance with Chapter 481 'Virginia Radiation Protection Regulation' and the conditions of your license. These inspections may be unannounced or scheduled.

If you have any questions, feel free to contact me at 804-693-8930 or beth.schilke@vdh.virginia.gov.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Beth M. Schilke', written over a horizontal line.

CONDITIONS

10. Licensed material shall be used and stored at the licensee's facilities located at 1356 North Main Street, Harrisonburg, Virginia, 402 Bufflick Road, Winchester, Virginia and may be used at temporary job sites of the licensee anywhere in Virginia where VDH maintains jurisdiction for regulating the use of licensed material.

RADIOACTIVE MATERIALS LICENSE

License Number: 165-435-1

Amendment No: 4

11. The Radiation Safety Officer for this license is **Mark A. Viola, PE**.
12. Licensed material shall only be used by, or under the supervision and in the physical presence of, individuals who have received the training described in the application dated **October 28, 2019**, have been instructed in licensee's operating and emergency procedures and approved in writing by the Radiation Safety Officer.
13. The licensee is authorized to transport licensed material in accordance with the provisions of Chapter 481, Part XIII, 'Transportation of Radioactive Material.'
14. Sealed sources containing licensed material shall not be opened or removed from their source holders by the licensee.
15. The licensee shall conduct a physical inventory every 6 months, or at other intervals approved by the agency, to account for all sealed sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, location, individual performing inventory and the date of the inventory.
16. The licensee shall maintain a utilization log where the portable gauge(s) are stored. The log shall contain the date(s) of use, temporary job site(s), serial number of the gauge, and the name(s) of the authorized user(s). Records of the utilization log shall be maintained for 5 years.
17. Any cleaning, maintenance, or repair of a gauge that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or by other persons specifically licensed by VDH, the NRC or another Agreement State to perform such services.
18.
 - A. If the licensee uses unshielded sealed sources extended more than 3 feet below the surface, the licensee shall use surface casing that extends from the lowest depth to 12 inches above the surface and other appropriate procedures to reduce the probability of the source or probe becoming lodged below the surface. If it is not feasible to extend the casing 12 inches above the surface, the licensee shall implement procedures to ensure that the cased hole is free of obstruction before making measurements.
 - B. If a sealed source or a probe containing sealed sources becomes lodged below the surface and it becomes apparent that efforts to recover the sealed source or probe may not be successful, the licensee shall notify the agency and submit the report required by 12VAC5-481-1110. The licensee shall not abandon the sealed source or probe without obtaining the agency's prior written consent.
19. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 12VAC5-481-450 C for establishing decommissioning financial assurance.
20. Per 12VAC5-481-740, no sealed source shall be stored for a period of more than 5 years without being tested for leakage or contamination.

RADIOACTIVE MATERIALS LICENSE

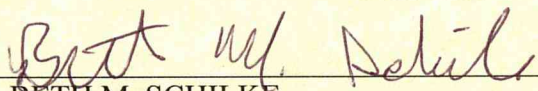

License Number: 165-435-1

Amendment No: 4

21. Except for maintaining labeling as required by 12VAC5-481, Part IV or XIII, the licensee shall obtain authorization from the agency before making any changes in the sealed source, device, or source-device combination that would alter the description or specifications in the respective Certificates of Registration issued either by the NRC or by an agreement state.
22. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. Chapter 481 'Virginia Radiation Protection Regulations' shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the rule.

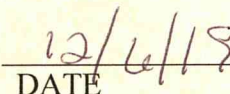

A. Application dated October 28, 2019.
