Subject: Pending NRC License Amendment Request - Additional Information Requested
Date: Wednesday, August 18, 2021 1:40:00 PM

Hello Jeffrey,

I hope that you are well. I am currently processing your NRC license amendment request to decommission your former Outpatient Surgery Center located at 100 Entrance Way, St. Peters, MO.

I understand from the information submitted that the facility has not been used for manual brachytherapy since 2015, but I noted that the submitted letter did not reference what happened to any remaining materials that were onsite at the time of that transition. Please provide records or a statement confirming how final materials were dispositioned (i.e. transferred to the main hospital hotlab, disposed of through decay-in-storage, returned to the manufacturer, etc.).

Please feel free to call me at 630-829-9712 or reach out to me through email with any questions. Please ensure your response is appropriately signed and dated, and your response may be submitted to me directly as an attachment via email.

Thank you,
Laura
