Hello Osiris:

Our team working on the SNM-1337 license renewal met to discuss the path forward to modify the NRC SNM license application. It was agreed that in order to allow sufficient time for the Reactor Safety Committee to review the modified license application, that we would like to request an additional 30 days, for a total of 90 days for ISU's response to the request for information. (Most of the Reactor Safety Committee members are employed full time outside of ISU and thus have requested the 30 day review period for all documents going forward.)

The general plan is as follows:

Days 1-45 make necessary changes to document

Days 45-75 Reactor Safety Committee review

Days 75-90 make final changes based on review and submit

Would the NRC be willing to grant ISU this additional extension? And do I need to make this request with a formal letter?

Thank you Osiris.

Best-

Donna
