Subject: [External_Sender] Certification of nuclear plant

Absolutely NOT! I would not be agreeable to your timeline of 40 years for this nuclear plant to have a renewable license. There has been things happening without recourse and has affected people in and around this and surrounding areas. Sure they are so concerned right now, but in reality, it is a game for them.

The leakage in the plant and the fire in the barrel would not have been brought to my attention except for the news coverage. I am appalled and disgusted that there is so little concept of life. What happens at this Plant can affect my life and others for decades and cause much sickness and death!!

I would suggest and recommend that this Plant have a 5-year recertification plan and anything that happens in between that time is addressed right away. I will not accept anything less!

Thank you for your time

Patricia Witter
