SUBJECT: COMANCHE PEAK NUCLEAR POWER PLANT, UNITS 1 AND 2 - NRC
INITIAL OPERATOR LICENSING EXAMINATION APPROVAL
05000445/2021301 AND 05000446/2021301

Dear Mr. Peters:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examination at Comanche Peak Nuclear Power Plant, Units 1, and 2.

The U.S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications submitted in connection with this examination and separately provided a list of approved applicants to Mr. Jordan Ruby, Examination and Simulator Supervisor. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject examination and the NRC staff will administer the operating tests during the week of September 20, 2021. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at 817-200-1159.

Please contact Mr. Nicholas Hernandez, Operations Engineer, at 817-200-1118, or Mr. John Kirkland, Chief Examiner, at 817-200-1771, if you have any questions or identify any errors or changes in the license level (reactor operator or senior reactor operator), or the type of examination (partial or complete written examination and/or operating test) specified for each applicant approved to take the examination.

Sincerely,

Signed by George, Gerond
