Subject: License No.: 37-27891-02 - Termination Request

To the Division of Nuclear Materials Safety,

This letter is to accompany Form 314 submitted by System One to the NRC on 09/08/2021. System One would like to clarify that the official request to terminate RAM License No.: 37-27891-02 will necessitate no disposal or transfer of any licensed radioactive materials. System One currently possesses and operates all its sealed radiographic sources under Pennsylvania License No.: PA-1148. The company's NRC RAM License was established for the purpose of supporting a high volume of industrial radiography in the state of West Virginia. The volume of radiographic work in this state no longer supports the continued maintenance of this license. Moving forward, System One intends to apply for reciprocity permissions with the NRC in order to support radiographic operations within its jurisdiction.

We would like to express our gratitude to the Nuclear Regulatory Commission for its years of guidance and support in helping us to maintain our Radioactive Materials license and to strengthen our company's radiation protection program.

Please don't hesitate to contact my office with any comments, questions, or concerns.

Please send the license termination notice and any future communications to System One Holdings LLC, attention Mark Fenske, Executive Vice President, 210 Sixth Avenue, Suite 3100, Pittsburgh, PA 15222.

Respectfully,

Jerome E Mulligan
Corporate Radiation Safety Officer, Quality Solutions
System One Holdings LLC
