Subject: [External_Sender] Re: State Notification of Amendments to Surry Power Station, Units 1 and 2 - Request to Revise Technical Specifications 2.1.A.1.b

Mr. Thomas:

The Virginia Department of Health's Office of Radiological Health has no questions or comments in favor of or opposition to the subject amendments.

Please note that I am on leave until retirement, and Le Perlas is serving as the Interim Director.

Thank you,
Steve Harrison

Hello,

The Nuclear Regulatory Commission (NRC) staff is nearing its completion of the amendments for the Surry Power Station, Units 1 and 2 to permit the licensee to revise Technical Specifications 2.1.A.1.b, "Safety Limit Reactor Core," to reflect the peak fuel centerline melt temperature specified in WCAP-17642-P-A, Revision 1, "Westinghouse Performance Analysis and Design Model (PAD5)."

The application is dated September 30, 2020 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML20274A329).

The no significant hazards consideration determination was noticed in the Federal Register on December 29, 2020 Vol. 85, No. 249 (FRN: 85 FR 85678), Attached.

Please respond if you have any or no comments.

Thank you,

Vaughn Thomas, Project Manager

Plant Licensing Branch II-1

Division of Operating Reactor Licensing

Office of Nuclear Reactor Regulation
