Union, MO 63084

SUBJECT: AMENDMENT NO. 9 TO RADIOACTIVE MATERIALS LICENSE FOR COCHRAN,
NRC LICENSE NO. 24-32594-01

Dear Mr. Beuke:

Enclosed is Amendment No. 9 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-32594-01 in accordance with your July 7, 2021 and September 7, 2021 requests.

Your license has been amended to add authorization for the additional locations of use and storage located at:

- 1163 Maple St., Farmington, Missouri 63640; and
- 2804 N. Biago St., Ozark, Missouri 65721.

To ensure compliance with Title 10 Code of Federal Regulations (10 CFR) §20.1301, update your individual members of the public dose compliance study to account for the additional permanent storage locations. Note that you are required to maintain radiation doses as low as reasonably achievable (ALARA) and in compliance with the member of the public dose limits of 100 millirem in a year and 2 millirem in any one hour in unrestricted areas.

Your request dated July 7, 2021 identified that all licensed radioactive materials will be removed from your permanent storage site located at 534 Maple Valley Dr., Farmington, Missouri 63640, upon issuance of the requested license amendment.

In support of your request, submit the following information:

- Records of the completed transfer and/or disposal for all sealed sources or portable gauging devices previously stored at the former location. If transferred outside of your organization, please provide a copy of the transferee's license and a letter confirming receipt of the transferred portable gauging devices.
- Current Leak Test Reports for all sealed sources or portable gauging devices previously stored at the former location.
- Description of any incidents involving ruptured, leaking or lost sealed sources or portable gauging devices along with any other incidents involving radioactive materials at the former permanent storage location.

You may refer to Control Number 627301 to reference any previously submitted documentation.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

T. Beuke

-2-

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) RIS 2005-31 provides criteria to identify security related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC's Generic Communications Web page under "Regulatory Issue Summaries" at <https://www.nrc.gov/reading-rm/doc-collections/gen-comm/>, and the link for frequently asked questions regarding protection of security-related sensitive information may be located at <https://www.nrc.gov/reading-rm/sensitive-info/faq.html>.
