Subject: [External_Sender] The NRC must do better on Environmental Justice

To Whom it May Concern,

I am asking the NRC to create rules that allow nuclear reactors that are shutdown to be mothballed so as to be available for future use. I am also asking for the NRC to get rid of it's ALARA rules which are applied only to nuclear power plants while coal plants produce 100x the radiation. I would also like to see the NRC facilitate and fast track the approval of new nuclear plant designs so as to better deal with our Climate Emergency and provide jobs and economic growth for our nation producing clean safe reliable energy.

Thank you for your attention,

Regards,
Gabriel Ignetti
