That does not really answer my question. If this location was on your license, then we need to formally release it. This is usually done PRIOR to releasing the facility, by a letter requesting that it be released and providing the documentation. I will go ahead and use these emails to open an action.

Betsy,

The lab at 219 Fort Johnson Road no longer needs to be on the license because the lab as a whole, has been turned over to SCDNR. We no longer work in that building.

Are you requesting that we amend the license to release this facility? If so, I need a letter requesting such an amendment. It needs to be a signed letter from a management representative. That letter can be attached to an email sent directly to our incoming mail email address

Good morning,

As we discussed yesterday I am sending you the decommissioning survey for our old Rad lab that was conducted by Glenn Goudy.
