Marjan Muvceski  
Radiation Safety Officer  
Franciscan Alliance, Inc. d/b/a Franciscan  
Health Dyer  
24 Joliet St.  
Dyer, IN 46311

SUBJECT: AMENDMENT NO. 98 TO RADIOACTIVE MATERIALS LICENSE FOR  
FRANCISCAN ALLIANCE, INC. D/B/A FRANCISCAN HEALTH DYER, NRC  
LICENSE NO. 13-02047-02

Dear Mr. Muvceski:

Enclosed is Amendment No. 98 to Franciscan Alliance, Inc. d/b/a Franciscan Health Dyer's (your) U.S. Nuclear Regulatory Commission (NRC) Materials License No. 13-02047-02 in accordance with your October 4, 2021 request to update the licensee name, change the mailing address, and remove the Hammond, Indiana location of use from your license. Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML21288A091. The NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Please review the enclosed document carefully, and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III Office at 630-829-9892 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(c).

The NRC staff has reviewed your final status surveys for the 5454 Hohman Ave., Hammond, Indiana location of use. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions, no further remediation or actions are required with respect to NRC-regulated material at the 5454 Hohman Ave. location of use. Your facilities at 5454 Hohman Ave., Hammond, Indiana, are suitable for unrestricted use.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,

Sara A. Forster, M.S.  
Health Physicist  
Materials Licensing Branch  
Division of Nuclear Materials Safety
