Subject: [External_Sender] University of Utah Nuclear Waste Research Probject

Hello Chairman and Commissioners,

My name is Eric Nielson and I go to the University of Utah. In my Leap class (Social and Ethical Implications of Engineering) we're presenting on the sustainability of nuclear waste disposal. Me and my team want to know your views and knowledge in these topics.

What are decent developments in nuclear waste disposal?

What recent breakthroughs have lead to longer lasting dry and wet storage of nuclear waste.

What is the biggest recent improvements in nuclear waste disposal?

As well as anything you are willing to tell us that may help our presentation in the nuclear waste industry.

Anything will help and I hope this email finds you.

Thanks again,

Eric Nielson
