

Request for Additional Information

Mercy Hospital South (CN627101)

License No. 24-01041-04

Docket No. 030-10108

With regard to your license renewal request dated June 9, 2021, please address the following:

- 1) Please provide the make and model number of your current high dose remote afterloader (HDR) device. Also, please clarify the make and model of the sealed source(s) used in the HDR device.
- 2) Your renewal request referenced two documents which were related to a previous request to remove 35.400 sources from your license (current Items 6.D., E., F. and G.). These documents were letters dated November 25, 2020 and March 25, 2021. Neither of these documents provided sufficient information related to the disposition of your 35.400 sources to allow us to remove them.

Please provide additional information related to these sources if you wish for them to be removed from the license.

- 3) Please provide a current list of all authorized users (AUs) and authorized medical physicists (AMPs) that you wish to be listed on the license, along with their authorizations listed.

Hey Jamie and Dr. Turco,

Please find attached a Request for Additional Information (RAI) with regard to your renewal request dated 06/09/21.

Please return your response to me by email with a PDF **signed** letter attached. If I can get that back ASAP, I will complete the renewal quickly.

Dr Turco – as discussed, I would prefer to defer your request to name your own Authorized Users on this license (see Sections 7.1 and 7.2 of your renewal request dated 06/09/21). Doing that would effectively expand this license to a Broad Scope license, much like the Mercy – St. Louis license, and I believe that is a matter better dealt with after this license is renewed since it will require a number of areas of consideration. Therefore, Item No. 3 of the attached RAI is a request for a full list of all AUs and AMPs you wish to be listed on the license.

If you have any questions, please let me know.

Thanks.

Bryan
