SUBJECT: U.S. NUCLEAR REGULATORY COMMISSION'S ANALYSIS OF TMI-2
SOLUTIONS DECOMMISSIONING FUNDING STATUS REPORT FOR
THREE MILE ISLAND NUCLEAR STATION, UNIT 2, DOCKET NO 50-320
(EPID NO L-2019-PMP-0141)

Dear Mr. van Noordennen:

By letter dated March 31, 2021, the U.S. Nuclear Regulatory Commission (NRC) received your decommissioning funding status (DFS) report (Agencywide Documents Access and Management System Accession No. ML21099A115) for Three Mile Island Nuclear Station, Unit-2 (TMI-2).

The NRC has reviewed and analyzed the site-specific decommissioning cost estimate, as required in Title 10 of the *Code of Federal Regulations* (10 CFR) 50.82(a)(4)(i), and the amount stated within the licensee's decommissioning trust fund, as of December 31, 2020, for the above plant, as well as earnings assumptions. Based on the reported decommissioning trust balance, together with earnings credits specified under NRC regulations, the NRC has determined that as of December 31, 2020, TMI-2 Solutions, LLC is providing a total amount of decommissioning funding assurance in the amount of \$862,549,586 for radiological decommissioning of TMI-2.

This letter confirms the correspondence, described above, regarding DFS reports for permanently shut down power reactors as required under 10 CFR 50.82(a)(v) - (vi). As of the date of this letter, considering the available information, the NRC has determined that Exelon has satisfied the decommissioning funding assurance requirements of 10 CFR 50.82, "Termination of License," for TMI-2 on December 31, 2020. A summary report completed by NRC staff reflecting decommissioning power reactor DFSs is expected to be completed and made publicly available by the end of calendar year 2020.

If you have any questions in this matter, please contact Ted Smith at Theodore.Smith@nrc.gov.

Sincerely,

Signed by Smith, Theodore
