Subject: Pending NRC License Amendment Request - Rayus Radiology
Date: Friday, November 05, 2021 12:45:00 PM

Hello Patrick,

I hope that you are well. I am currently reviewing your request for Rayus Radiology to decommission their facility located in Muncie, IN. I have reviewed the information submitted and have the following questions:

1. It was noted in the provided letter that leak test records for sealed sources were enclosed, but it does not appear that they were actually provided. Please submit leak test records for all sealed sources utilized at this facility.
2. Provide the date that licensed material was last actually used at the facility.
3. Indicate how final disposition of unsealed material, including waste, was performed (i.e. decay-in-storage, transfer to another authorized location or licensee, etc). If material was disposed of through decay-in-storage provide final waste records.

Please provide your response to the above listed items by no later than Friday, Dec. 3, 2021. Please feel free to reach out to me with any questions at 630-829-9712 or via email.

Thank you,
Laura
