**SUBJECT: TRANSMITTAL OF UMTRA PROJECT CRESCENT JUNCTION
DISPOSAL CELL INTERIM COMPLETION REPORT,
ADDENDUM K**

Dear Mr. Mandeville:

The Moab Uranium Mill Tailings Remedial Action (UMTRA) Project began placing uranium mill tailings and other residual radioactive material (RRM) in the disposal cell in April 2009. Because it will take many years to complete the disposal cell, the Moab UMTRA Project prepares sequential addenda Interim Completion Reports that will be referenced in a Final Completion Report that will address the entire completed cell.

The *Moab UMTRA Project Crescent Junction Disposal Cell Interim Completion Report Addendum K* (DOE-EM/GJRAC2040-K), which addresses activities performed from October 1, 2020, through September 30, 2021, has been electronically submitted via the NRC Electronic Submittals System. This report includes placement of 555,750 yd³ of RRM and 27,016 yd³ of final cover materials.

If there are questions, please contact me at 859-227-5016.

Sincerely,

A handwritten signature in dark ink, reading "Russell McCallister".

Russell McCallister
Federal Cleanup Director
