NRC

There is no reason why the license for Point Beach nuclear facility should be extended, but there are a multitude of reasons why to not extend:

- cost of repairs
- danger of operating old nuclear reactors
- leaks
- cleanup should not be put off
- continuation of creating more nuclear waste is an environmental crisis
- using funds for a toxic industry that could be spent on clean technology
- health risks
- increased risks of melt downs from aging reactor parts

Nuclear reactors built for 20 years should not be allowed license extensions to 80 years.

Point Beach should not be relicensed. The Great Lakes should be protected, not risked and sacrificed.

Sincerely

Kathryn Barnes
