Subject: [External_Sender] Clarification for ADAMS Accession Number ML21337A024
Date: Monday, December 13, 2021 10:40:24 AM

Mike,

We reviewed the Telephonic Meeting record with Accession Number ML21337A024 and wanted to provide the following clarification (in red).

“In a telephonic meeting held on December 1, 2021, the NRC and licensee discussed the status of Pickard Hall and the NRC was informed that during the last month: There has been no radiological remediation in or around Pickard Hall; **some of the** items that were being held for radiological clearance (lockers, shelves, chairs, and the like) have been surveyed and deemed able to be released for unrestricted use - the licensee is continuing to prepare to remove the material from the building.”

To clarify, not all items have been surveyed yet and more will be surveyed once the items which have been deemed releasable are removed allowing us to access additional items.

Please let us know if you have any questions.

Charles A. Wilson IV, PhD, CLSO, CSP
