Amy and Harry,

I wanted to share the following statement that was issued to stakeholders, the media and on our social media channels today. Feel free to contact me with any questions. I know there was a lot of churn around this over the weekend.

Happy Holidays,
-Pat

“Since the November 22nd Nuclear Decommissioning Citizens Advisory meeting there have been questions and concerns around the final disposition of processed water on the site. We have been consistent in our messaging since that meeting that over the next year we will be evaluating the regulatory approved options available and no final decisions have been made. The EPA and NRC have strict regulations regarding the disposition of all effluents from any decommissioning site and Holtec confirms that these requirements will be followed in all states where we conduct operations. We wanted to share that in the near term the decision at Pilgrim has been made that the processed water will remain on site, safely stored, and that we will not discharge any processed water in 2022 while this evaluation is undertaken. We appreciate and understand the public’s questions and concerns and remain committed to an open, transparent process on the decommissioning of Pilgrim Station focused on the health and safety of the public, the environment, and on-site personnel .”

Patrick O'Brien
