Subject: [External]: Pending NRC License Amendment Request - Additional Information Requested

Hello Aura,

I hope that you are well. I am currently processing your NRC license amendment request dated December 1, 2021 to authorize an additional sealed source for the calibration of a Bruker Model Si 78 VET CT scanner.

I have been unable to locate the specific sealed source requested in our Sealed Source and Device Registry. In many cases calibration or other check sources are manufactured by a different entity and registered under that company name with the NRC. Please confirm the manufacturer and model number of the sealed source requested or provide an NRC Sealed Source and Device Registry number for continued processing of your licensing request.

Please feel free to reach out to me with any questions.

Thank you,
Laura
