Lansing, MI 48906

SUBJECT: WITHDRAWAL OF AMENDMENT REQUEST RELATED TO THE PRODUCTION OF
MOLYBDENUM-99 FOR NIOWAVE, INC., NRC LICENSE NO. 21-35144-04

Dear Dr. Peters:

This letter concerns the subject request to amend your U.S. Nuclear Regulatory Commission (NRC) License No. 21-35144-04. You have requested to possess and use low enrichment uranium and natural uranium for the production of molybdenum-99 in the applications dated March 15, 2021 (Agencywide Documents Access and Management System [ADAMS] Accession No. ML21078A038), and October 1, 2021 (ADAMS Accession No. ML21288A118).

Based on the letter dated January 12, 2022 (ADAMS Accession No. ML22012A443), you informed us that you no longer need the requested action and you are withdrawing the amendment request. Therefore, we have administratively closed your license amendment request. Administrative closure is an action taken without prejudice to the applicant or licensee such that it does not preclude the applicant/licensee from resubmitting the request at a future time.

In accordance with 10 CFR 2.390 of NRC's "Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

If you have any questions, please contact me at 630-829-9623 or Frank.Tran@nrc.gov.

Sincerely,

Frank P. D. Tran
Health Physicist
Materials Licensing Branch
Division of Nuclear Materials Safety
