**Request to recategorize SUA-1473 correspondence in ADAMS**

Dear Mr. Lancaster,

Rio Algom Mining LLC (RAML) has reviewed the Agencywide Documents Access and Management System (ADAMS) for records relevant to its radioactive materials license (SUA-1473) that may have been incorrectly filed under other license numbers (e.g., SUA-1475). When records are filed under another license number, they are not returned in a content search within ADAMS using the document properties query system for license number SUA-1473.

The records which may be incorrectly filed in ADAMS under other license numbers are identified in Table 1. RAML requests that NRC evaluate and if appropriate file or reclassify these records relevant to SUA-1473.

If you have any questions or need additional information, please do not hesitate to call me at (916) 947-7637.

Sincerely,

Sandra L. Ross, P.G.  
Site Manager  
Rio Algom Mining, LLC
