SUBJECT: WITHDRAWAL OF AMENDMENT REQUEST DATED JUNE 24, 2020 FOR  
TUV RHEINLAND INDUSTRIAL SOLUTIONS, INC., NRC LICENSE NO. 37-  
32340-02

Dear Mr. Dugan:

This letter concerns the subject request to amend your U.S. Nuclear Regulatory Commission (NRC) License no. 37-32340-02. You requested a change in the Radiation Safety Officer for the license and a change in the location of record management and storage. Your amendment request is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML20182A456.

In a telephone call requesting additional information between you and me on August 27, 2020, you indicated that the requested information would be forthcoming.

When we received no response after a few months, I contacted you again and learned that you were verbally withdrawing the amendment request because you no longer need the requested action at this time.

Therefore, we have administratively closed your license amendment request. Note that if you submit a new request at a later date, you may refer to Control No. 621339 for the documentation you have already submitted.

Please note, however, that if you still wish to change the location of record management and storage, you should do so in an amendment request. You may cite your request as additional information to control no. 621339 and specify that it should be to my attention.

Please also ensure that future licensing correspondence to us is signed by a senior management representative. The license is issued to the owner/senior management and is not issued to the appointed Radiation Safety Officer. This is especially important when significant changes to the licensed program are being requested, including, but not limited to, a change in the Radiation Safety Officer, renewal of a license, and changes in addresses of use.

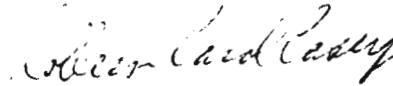

In accordance with 10 CFR 2.390 of NRC's "Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room
