NUCLEAR REGULATORY COMMISSION
REGION IV
1600 E. LAMAR BLVD
ARLINGTON TX 76011-4511

February 28, 2022

Mr. Tom Clawson
Radiation Safety Officer
Technical Resources Group, Inc.
1361 Cambridge Drive
Idaho Falls, ID 83401

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION, NRC LICENSE NO. 11-35127-01

Mr. Clawson:

We have initiated the review of your amendment request dated February 23, 2022 (Agencywide Documents Access and Management System (ADAMS) Accession Number ML22055B032). Please note the following.

NUREG-1556, Volume 7, Revision 1, "Consolidated Guidance About Materials Licenses, Program-Specific Guidance About Academic, Research and Development, and Other Licenses of Limited Scope," states that if licensed material will be deliberately released into the environment, an environmental assessment may be needed according to Title 10 of the *Code of Federal Regulations* (10 CFR) 51.21, "Criteria for and Identification of Licensing and Regulatory Actions Requiring Environmental Assessments." The Nuclear Regulatory Commission (NRC) will use the following documents to conduct its environmental review to determine if the proposed activity needs an environmental assessment.

1. Section 4.10, "Categorical Exclusions for Materials Licensing Actions," of NUREG-1556, Volume 20, revision 1, "Consolidated Guidance About Materials Licenses, Guidance About Administrative Licensing Procedures"
2. NUREG-1748, "Environmental Review Guidance for Licensing Actions Associated with NMSS Programs"

Before we can take further action, we will need the following additional information.

1. Provide a description of the proposed activity for unsealed P-32, F-18, Tc-99m, and TI-201, to be used during training and field support of emergency response exercises.
2. Provide a description of the receipt, use, storage, dispersion, and disposal of unsealed P-32, F-18, Tc-99m and TI-201, during training and field support of emergency response exercises.
3. Provide the physical address and jurisdiction (NRC and/or Agreement State) where unsealed P-32, F-18, Tc-99m and TI-201, will be received, used, stored, dispersed, and disposed during training and field support of emergency response exercises.

To continue review of your application, we request that you submit your response to this letter within 30 calendar days from the date of this letter. In your response, please refer to the license, docket, and control number specified below. We will assume that you do not wish to further pursue this licensing action if we do not receive a reply within the specified timeframe noted above.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be made available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

If you have questions or require clarification on any of the information stated above, please contact me at 817-200-1189.

Thank you for your cooperation.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist
Materials Licensing Branch
