

PUBLIC MEETING ANNOUNCEMENT

Title: Workshop to Exchange Practices for Licensing and Certification Testing

Date(s) and Time(s): March 01, 2022, 01:00 PM to 04:30 PM ET
March 02, 2022, 10:30 AM to 04:30 PM ET

Location: Webinar

Category: This is an Information Meeting with a Question and Answer Session. The purpose of this meeting is for the NRC staff to meet directly with individuals to discuss regulatory and technical issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed throughout the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The purpose of this workshop will be to share information and insights from subject matter experts on best practices in testing and examination development within the context of qualifying workers to perform jobs that can significantly affect public safety. Participants for this workshop are being sought from within government, academia, and a variety of industries, both within the U.S. and internationally. Examples of the types of questions to be considered during this workshop include the following:

How do you determine that personnel in safety significant jobs (such as, for example, nuclear plant operators, pilots, locomotive engineers, etc.) are qualified to perform the important roles to which they are assigned?

How do you ensure that personnel have mastered the knowledge needed to perform their jobs prior to licensing, certification, qualification, etc.?

How do you have confidence that the examination processes and testing methodologies used ensure that people are appropriately qualified?
