---

Mr. Klootwyk:

The NRC has initiated the review of the renewal application of NRC license 04-29436-01 and the following deficiencies were identified.

1. Item 3 of letter dated February 3, 2022 did not provide physical address in Maui where licensed material is used and/or stored.
2. Item 5 of letter dated February 3, 2022 provides incorrect information (radionuclides, source information and activity is incorrectly identified for a specific gauge model number).
3. Items 6 through 11 of letter dated February 3, 2022 did not follow the format specified in revised guidance NUREG-1556, Volume 1, revision 2 (attached).

To correct these deficiencies please complete the attached Appendix B of NUREG-1556, Volume 1, revision 2 (items 5 through 11), provide the requested supporting documentation (training documents and facility diagrams) and submit in a signed and dated letter by reply email as a pdf file.

Thank you for your cooperation.

Roberto J. Torres, M.S.
