Mail Control Number: 630230
Docket Number : 3037426
License Number : 49-29255-01
Licensee Name : Sinclair Wyoming Refining Company

February 25, 2022
To Whom It May Concern:

As part of the responsibilities of the Radiation Safety Officer and Management for Sinclair Wyoming Refining Company (SWRC), operating under NRC License No. 4929255-01, we are writing to inform you of parent company ownership and name changes. SWRC is currently a subsidiary of Sinclair Oil Company, which is merging with Holly Frontier Corporation to become HF Sinclair. As part of that transaction, the name of the Sinclair Wyoming Refining Company will be changed to Sinclair Wyoming Refining Company LLC. The timing of the merger has not yet been finalized but is expected sometime in 2022.

This is a change in the parent company structure and a name change of the license holding company, but there are no changes expected to personnel or duties that relate to the licensed program or any changes to the location, equipment, or radiation safety programs at the facility. Record keeping will remain as is.

If there are any questions or additional obligations that need to be met in connection with these changes, please notify us.

Regards,

Michael Nay; Radiation Safety Officer

Definitions:

Control: Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and, thus, the direction of the activities under the license.

Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation.

Transferor: A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Information Needed for Transfer of Control

Licensees must provide full information and obtain NRC's **prior written consent** before transferring control of the license. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). **If any items are not applicable, so state.**

1. Describe any planned changes in the organization, including but not limited to, transfer of stocks or assets and mergers, change in members on Board of Directors, etc. Provide the new licensee name, mailing address, and contact information, including phone numbers. **Clearly identify when the amendment request is due to a name change only.**

This amendment request is due to a name change only. Our name will be changing from Sinclair Wyoming Refining Company (SWRC) to Sinclair Wyoming Refining Company (SWRC) LLC.

2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel and any changes in the training program.
No additional changes will be made.
3. Describe any changes in the location, facilities, equipment, radiation safety program, use, possession, waste management, or other procedures that relate to the licensed program.

No additional changes will be made.

4. Describe the status of the licensee's facilities, equipment, and radiation safety program, including any known contamination and whether decontamination will occur prior to transfer. Include the status of calibrations, leak tests, area surveys, wipe tests, training, quality control, and related records.

All pieces of equipment are fully operational. We are in full compliance with all of the above and have records to indicate such.

5. If current decommissioning funding plans (DFP) will be changed as a result of the transfer, the revised DFP should be submitted. If other financial assurance documents will be changed as a result of the transfer, confirm that all financial assurance instruments associated with the license will be held in the transferee's name before the license is transferred, and as required by 10 CFR 30.35(f), the licensee must, within 30 days, submit financial instruments reflecting such changes.

Not applicable.

6. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

Not applicable.

7. Confirm that both transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.

Not applicable.

8. Confirm that the transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Not applicable.

9. The transferee, in the case of fuel cycle facilities, shall provide documentation showing that it is financially qualified to conduct normal operations. The information can be in the form of income statements and balance sheet forecasts.

Not applicable.
