LICENSING WRITTEN EXAMINATION APPROVAL (05200025/2022301 AND  
05200026/2022301)

Dear Mr. Curry:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examination at Vogtle Electric Generating Plant Unit 3 & 4.

The U.S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications submitted in connection with this examination and separately provided a list of approved applicants to your office. Note that any examination waivers and deferrals have been addressed in separate correspondence.

The U.S. Nuclear Regulatory Commission (NRC) has approved the subject operating test and written examinations, and you may administer the written examinations in accordance with Revision 11 to NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," during the week of March 21, 2022. The NRC staff will administer the operating tests during the week of March 14, 2022, and March 21, 2022, if necessary.

The examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (404) 997-4662.

Please contact your Chief Examiner, Mr. Bruno Caballero, at (404) 997-4608, if you have any questions or identify any errors or changes in license level (reactor operator or senior reactor operator) or type of examination (partial or complete written examination or operating test, or

both) specified for each applicant approved to take the examination.

Sincerely,
