General Comment

I am writing to express my support of the NRC permitting process for Kairos Power's construction and licensing permit application for the Hermes demonstration reactor they plan to build at Heritage Center (ETTP) in Oak Ridge, Tennessee. In my opinion, the local community, of which I am a life-long resident, has welcomed the opportunity to continue its long-standing tradition of supporting energy innovation as well. The former K-25 site has a significant history of supporting the nation's energy and safeguards, and I'm very pleased Kairos Power is investing in our local community and the nation's future.
