

Robert Anderson

Bob started his career at the Idaho National Laboratory (INL) over 35 years ago as a control systems design engineer at a nuclear manufacturing facility. Several years later, he relocated to the US Department of Energy (DOE) Advanced Test Reactor working as an Instrumentation and Control system engineer. As INL engaged with the US DOE National SCADA Test Bed and the US Department of Homeland Security Industrial Control Systems Cyber Emergency Response Team (ICS-CERT) programs, Bob was asked to join the programs as an Industrial Control Systems subject matter expert. Through these engagements over the years, Bob became a cyber security specialist. About ten years ago, Bob began specializing in nuclear cyber security internationally specifically with the IAEA and other international engagements.
