Additional Information (Reference applicable block numbers from page 1 and/or page 2 for each entry)

The reason I have stated these [redacted] source types differently than what was originally submitted is to better reflect the fact that a single verifier for example has a total of [redacted] of [redacted] Be but this total is made up of [redacted] individual capsules that are [redacted] each. Each verifier is assembled, used, and transported as the total activity but made up of smaller activity source capsules.

On the renewal application I am showing this for the same total activity per source assembly but showing specifics for each assembly.

1. Each Verifier has qty [redacted] of the [redacted] Be source for total of [redacted] for each assembly.
2. Each LWD Lab Calibration has qty [redacted] of the [redacted] Be source for total of [redacted] per each assembly.
3. Each LWD Lab Calibration has a qty of [redacted] of the [redacted] sources for a total of [redacted] per each assembly.
