

U.S. NUCLEAR REGULATORY COMMISSION FY 2022 PROPOSED REPROGRAMMING FOR FEE-BASED PRIOR YEAR FUNDING (Dollars in Millions)			
Control Point	Beginning Carryover Balance	Reprogramming	Revised Carryover Balance
Nuclear Reactor Safety	\$ 26.760	\$ (3.325)	\$ 23.435
Nuclear Materials & Waste Safety	3.383	-	3.383
Decommissioning & LLW	2.902	-	2.902
Corporate Support	4.609	3.325	7.934
Total	\$ 37.654	\$ -	\$ 37.654

As shown in the table above, the U.S. Nuclear Regulatory Commission (NRC) intends to reprogram \$3.325 million in prior-year funding (fee-based carryover) from the Nuclear Reactor Safety control point to the Corporate Support control point. This reprogramming supports compliance with Executive Order 14028, "Improving the Nation's Cybersecurity," issued May 12, 2021, and funds the following activities:

- Enhance the record of events that occur within systems and networks (log data) to meet federally mandated requirements and Office of Management and Budget (OMB) Memorandum M-21-31, issued August 27, 2021, which addresses requirements in section 8 of Executive Order 14028. This activity will also involve the NRC providing log data to the Department of Homeland Security, Cybersecurity and Infrastructure Security Agency, for inclusion in the federal Continuous Diagnostics and Mitigation dashboard.
- Develop and update cybersecurity standards to comply with Executive Order 14028 and related OMB directives that have been recently released. This activity will allow the NRC to rapidly respond to cybersecurity data calls and to quickly determine impacts and risks to NRC systems and data.
- Support assessment of cybersecurity and information technology/information management technical standards to ensure that technologies acquired by the NRC are compliant with applicable statutory requirements, such as section 508 of the Rehabilitation Act of 1973. This activity will also support efforts to ensure that the NRC does not buy or deploy products and services that perform the same function, and that cloud solutions are authorized under the Federal Risk and Authorization Management Program.
