NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

July 14, 2022

Mr. Ken J. Peters  
Senior Vice President and  
Chief Nuclear Officer  
Attention: Regulatory Affairs  
Vistra Operations Company LLC  
Comanche Peak Nuclear Power Plant  
6322 N FM 56  
P.O. Box 1002  
Glen Rose, TX 76043

SUBJECT: COMANCHE PEAK NUCLEAR POWER PLANT, UNIT NOS. 1 AND 2 –  
CORRECTION TO AMENDMENT NOS. 182 AND 182 TO REVISE TECHNICAL  
SPECIFICATIONS TO ADOPT TSTF-577, REVISION 1, "REVISED  
FREQUENCIES FOR STEAM GENERATOR TUBE INSPECTIONS"  
(EPID L-2021-LLA-0134)

Dear Mr. Peters:

By letter dated February 24, 2022 (Agencywide Documents Access System (ADAMS) Accession No. ML21321A349), the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 182 to Facility Operating License No. NPF-87 and Amendment No. 182 to Facility Operating License No. NPF-89 for Comanche Peak Nuclear Power Plant, Unit Nos. 1 and 2 (Comanche Peak, Units 1 and 2), respectively. The amendments adopted Technical Specifications Task Force (TSTF) Traveler TSTF-577, "Revised Frequencies for Steam Generator Tube Inspections," which is an approved change to the Standard Technical Specifications, into the Comanche Peak, Unit 1 and 2, Technical Specifications.

The NRC staff identified errors in the heading on the first page of the safety evaluation (SE) in enclosure 3 of the February 24, 2022, letter. Specifically, the heading refers to renewed facility operating licenses for Comanche Peak Units 1 and 2. However, the facility operating licenses for Comanche Peak Units 1 and 2 have not been renewed. The corrected page 1 of the SE contains marginal lines indicating the areas of change

The NRC staff determined that the errors were inadvertently introduced during the preparation of the license amendment and are entirely typographical in nature. The corrections do not change any of the conclusions in the safety evaluation associated with the amendment and do not affect the associated notice to the public.

The enclosure to this letter contains the corrected first page of the SE. Please replace the corresponding page issued by Amendment Nos. 182 and 182 for Comanche Peak, Units 1 and 2, respectively.

We regret any inconvenience this may have caused. If you have any questions, please contact me at 301-415-6256 or [Dennis.Galvin@nrc.gov](mailto:Dennis.Galvin@nrc.gov).

Sincerely,

**/RA/**

## 1.0 PROPOSED CHANGES

Vistra Operations Company LLC (the licensee) requested changes to the Technical Specifications (TSs) for Comanche Peak Nuclear Power Plant (Comanche Peak), Unit Nos. 1 and 2, in its license amendment request (application). In its application, as supplemented, the licensee requested that the U.S. Nuclear Regulatory Commission (NRC, the Commission) process the proposed amendment under the Consolidated Line Item Improvement Process (CLIIP). The proposed changes would revise the "Unit 1 Model D76 and Unit 2 Model D5 Steam Generator (SG) Program" and the "Unit 1 Model D76 and Unit 2 Model D5 Steam Generator Tube Inspection Report" TSs based on Technical Specifications Task Force (TSTF) Traveler TSTF-577, Revision 1, "Revised Frequencies for Steam Generator Tube Inspections," dated March 1, 2021 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML21060B434), and the associated NRC staff safety evaluation (SE) of TSTF-577, dated April 14, 2021 (ADAMS Accession No. ML21098A188).

The tubes within an SG function as an integral part of the reactor coolant pressure boundary and, in addition, isolate fission products in the primary coolant from the secondary coolant and
