

**Response to Request for Information
House Committee on Oversight and Reform
Subcommittee on Government Operations
Letter Dated July 13, 2022**

- 1. How many M-19-19 defined federal data centers does your agency currently operate?**

Three.

- 2. If you are unable to answer the previous question based on the M-19-19 definition, how many federal data centers does your agency currently operate following the most up to date Integrated Data Collection guidance?**

Not applicable.

- 3. Continuing to adhere to the definition answered above:**

- a. Of these operating data centers, how many are key mission facilities?**

Two.

- b. Since the enactment of FITARA, how many data centers have you closed?**

Eight, including three Tiered and five non-Tiered data centers.

- c. Has your agency closed the maximum number of federal data centers possible?**

No.

- i. If no, please explain why and provide the timeline expected to complete data center closures.**

The U.S. Nuclear Regulatory Commission (NRC) has one remaining Tiered data center that is not a key mission facility. The NRC plans to continue to reduce operating costs by closing this data center. The NRC continues to migrate systems to the Cloud and our co-location facility. The closure of this data center is scheduled to be completed by the 4th quarter of fiscal year 2026.

- ii. If yes, please justify the reasons why your remaining federal data centers are vital to your agency's operations.**

Not applicable.
