

Materials Inspection Report

1. Licensee/Location Inspected:

Terracon Consultants, Inc.
2306 W. Phelps St.
Springfield, Missouri 65802

Report Number(s) 2022001

2. NRC/Regional Office

Region III
U. S. Nuclear Regulatory Commission
2443 Warrenville Road, Suite 210
Lisle, IL 60532-4352

3. Docket Number(s)

030-38835

4. License Number(s)

24-35241-01

5. Date(s) of Inspection

June 23, 2022

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

1. Based on the inspection findings, no violations were identified.

2. Previous violation(s) closed.

3. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements, and were assessed at Severity Level IV, in accordance with the NRC Enforcement Policy.

A. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy were satisfied.

(Non-cited violation(s) was/were discussed involving the following requirement(s))

B. The following violation(s) is/are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
(Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Locations Inspected: <input checked="" type="checkbox"/> Main Office <input type="checkbox"/> Field Office <input type="checkbox"/> Temporary Job Site <input type="checkbox"/> Remote		15. Next Inspection Date (MM/DD/YYYY): 06/23/2023 <input checked="" type="checkbox"/> Normal <input type="checkbox"/> Extended <input type="checkbox"/> Reduced <input type="checkbox"/> No change	

16. Scope and Observations:

This was an announced routine inspection of a non-destructive testing company authorized to use radioactive material for industrial radiography at a fabrication shop in Springfield, Missouri, and at temporary job sites in NRC jurisdiction. At the time of the inspection, the licensee employed two radiographers (including the RSO) and one radiographer's assistant who worked full-time at the Springfield facility, conducting weld inspections of stainless steel vessels manufactured on-site within a designated area as well as at temporary job sites in Missouri.

During the inspection, the inspector toured the licensee's facility, including the material storage area, the designated radiography area, and the licensee's radiography truck to evaluate the licensee's measures for material security, access control, postings, and exposure control. During the tour, the inspector verified the licensee equipment and instrumentation appeared to be operational and in good material condition. There were no scheduled exposures to observe, but the RSO demonstrated the licensee's procedures for material receipt, inventory control and boundary setup. The inspector also interviewed the RSO and radiographer's assistant regarding control of boundaries during radiographic operations, routine inspection and maintenance of equipment, source disposal, and emergency response procedures. The inspector also reviewed a selection of records associated with inventory, instrumentation calibration, dosimetry records, radiographer field audits, equipment inspections, leak test results, shipping papers, and periodic program reviews.

No violations of NRC requirements were identified as a result of this inspection

Michael,

As we discussed following my inspection, attached is the inspection report for the routine NRC inspection that was performed at your facility in Springfield, Missouri, on June 23, 2022. Please review and keep this document for your records. There is no response required, though I would appreciate an email confirming that you have received the document. Let me know if you have any questions.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, its enclosure, and your response, if you choose to provide one, will be made available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>. To the extent possible, your response should not include any personal privacy, proprietary, or safeguards information so that it can be made publicly available without redaction.
