Subject: Request to name A. Cox as the new RSO-U.S. NRC license no. 21-35551-01
Date: Friday, June 24, 2022 9:55:00 AM

Good morning,

I reviewed the licensee's request dated 5/11/22 to name A. Cox as the new Radiation Safety Officer (RSO).

Please clarify the following questions:

1. The ATI training certificates for Aaron Cox were signed by Damon L. Garrett, PE, President/Director of Operations. I searched our records and Mr. Garrett was not named an RSO on an NRC license. Please provide a copy of a license (Agreement State license) where Mr. Garrett is/was named an RSO.
2. If Mr. Garrett is/was not named an RSO on an NRC/Agreement State license, please provide the reason for signing the ATI certificates under "Signature of Licensee's RSO".
3. Please confirm that Aaron Cox received hands on training using the portable radioactive gauges while performing work in 2019-2022 as described in your letter dated 5/11/22 under "Employee Project Experience".

Please acknowledge receipt of this email.
Please respond by 7/11/2022.

Thank you

Magdalena R. Gryglak
