18 July 2022

Sara A. Forster, Health Physicist Licensing Reviewer  
U.S. Nuclear Regulatory Commission - Region III  
Division of Nuclear Materials Safety  
2443 Warrenville Rd. - Ste. 210  
Lisle, IL 60532-4352

Dear Sara,

This is in answer to the questions you asked in your email of 14 July 2022 with regards to our amendment request for NRC License No. 21-12275-02, CN 630578.

- The final date under which the 10 CFR 35.400 iodine-125 seeds were used for manual brachytherapy, as authorized under Subitem No. 6.D. 20 February 2018.
- The final date on which the 10 CFR 35.400 iodine-125 seeds were stored as decay-in-storage waste, following the final medical use of the material. 20 February 2018.
- The date on which the final decay-in-storage waste containing iodine-125 waste was surveyed and disposed. 18 July 2022.
- A history of any lost or leaking iodine-125 seeds, if any, under the license. There were no lost or leaking iodine-125 seeds that I am aware of.
- A confirmation that both the decay-in-storage waste and the areas where the iodine-125 seeds were used and stored have been surveyed to confirm that no residual iodine-125 activity remains, under the license. A survey showing no residual activity has been done for the areas where the iodine-125 seeds were used and stored for decay-in-storage waste.

RECEIVED AUG 01 2022

If you have any additional questions, then please do not hesitate to call or email me.

Sincerely,

A handwritten signature in cursive script that reads "Paul Jursinic".

Paul Jursinic, Ph.D.  
Radiation Safety Officer
