General Comment

I am commenting on the "Regulatory Improvements for Production and Utilization Facilities Transitioning to Decommissioning" plan the NRC is proposing.

As someone who lives within 10 miles of the Indian Point Nuclear Power Facility that is in the process of being decommissioned, the environmental outcome of such a short-sighted and anti-environmentally sensitive proposal is mind boggling. Your proposal decreases NRC oversight, allows for the dumping of nuclear waste into the Hudson River and eases tracking requirements as nuclear waste is transported across our state and the country. Would you want to live in an area that is allowing this? Shame on you for proposing this execrable plan.
