[Hopewell Designs, Inc. NR-1138-D-101-S Amended Certificate - SSD 22-06.pdf](#)

Dear Mr. Vanderpool,

We have completed your request to amend the registration certificate NR-1138-D-101-S to include the eight additional source models for use in the G10 series.

During the process of drafting the amended certificate, we noticed some source activities were changed in the submitted amendment request which were not bolded or italicized. Since these changes were not bolded or italicized, we have operated under the assumption that these are typos. Please review the below table which lists the sources with discrepant activities and advise whether the changes should be made to the certificate. If the changes should be applied, please let us know and we will issue a corrected copy of the certificate.

Device Model	Source Manufacturer	Source Model
G10-2-12	RAIMS	MC37C16
G10-2-360	Eckert & Ziegler	Cs7.N27_C
	RAIMS	MC37C17
	RAIMS	MC37C18
	RAIMS	MC37C19
G10-2-2600	RAIMS	MC37C17
	RAIMS	MC37C18
	RAIMS	MC37C19
	RAIMS	MC37C20
	RAIMS	MC37C21
	RAIMS	MC37C22
	Eckert & Ziegler	Cs7.N27_C
G10-3-150-A	Eckert & Ziegler	Cs7.N26_C
G10-2-360 (combination with Co-60)	Eckert & Ziegler	Cs7.N26_C
G10-2-2600 (combination with Co-60)	Eckert & Ziegler	Cs7.N26_C
	REVISS Services, Ltd.	R6020

In addition, because the text was bolded and italicized we did add the AECL/MDS Nordion source C-161, Type 8 to the G10-2-2600 version that is combined with Co-60. If the changes should not have been applied, please let us know and we will issue a corrected copy of the certificate.

Attached I have include a copy of the cover letter and amended registration certificate. I will also send the login information for the certificate in a separate email.

Please let me know if you have any problems opening the document.

Sincerely,

Joey Rolland
