10CFR 50.90

Ladies and Gentlemen:

**DOCKET NUMBER 50-483
CALLAWAY PLANT UNIT 1
UNION ELECTRIC CO.
RENEWED FACILITY OPERATING LICENSE NPF-30
APPLICATION TO REVISE TECHNICAL SPECIFICATIONS TO ADOPT TSTF 577,
"REVISED FREQUENCIES FOR STEAM GENERATOR TUBE INSPECTIONS" (LDCN 21-0013)**

Pursuant to 10 CFR 50.90, "Application for amendment of license or construction permit," Ameren Missouri (Union Electric Company) herewith requests an amendment to the Technical Specifications for Callaway Plant. The proposed amendment would modify Technical Specification (TS) requirements in Section 5.5.9, "Steam Generator (SG) Program," and Section 6.6.10, "Steam Generator Tube Inspection Report." These changes are consistent with NRC-approved Technical Specifications Task Force (TSTF) Traveler TSTF-577, "Revised Frequencies for Steam Generator Tube Inspections." These TSs are revised based on operating history.

Essential/supporting information is provided in the attachments to this letter. Attachment 1 provides a description and assessment of the proposed changes. Attachment 2 provides the existing TS pages marked up to show the proposed changes. Attachment 3 provides revised (retyped) TS pages, reflecting the proposed changes.

As described in Attachment 1 (and reflected in Attachments 2 and 3), the proposed amendment includes an additional, administrative/editorial change to TS 5.5.9 for removing an expired one-time provision attached to the TS which was incorporated per a previous license amendment but is no longer in effect. This "clean-up" change has no effect on the plant's current licensing basis and no impact on the changes proposed in accordance with TSTF-577.

It has been determined that this amendment application does not involve a significant hazards consideration, as determined per 10 CFR 50.92, "Issuance of amendment." Pursuant to 10 CFR 51.22, "Criterion categorical exclusion or otherwise not requiring environmental review," Section (b), no

environmental impact statement or environmental assessment need be prepared in connection with the issuance of this amendment.

Further, this submittal does not contain new commitments.

The Callaway Onsite Review Committee has reviewed and approved the proposed changes and has approved the submittal of this amendment application.

Ameren Missouri requests approval of the requested license amendment by February 15, 2023. Ameren Missouri further requests that the license amendment be made effective upon NRC issuance, to be implemented within 90 days from the date of issuance.

In accordance with 10 CFR 50.91 "Notice for public comment; State consultation," Section (b)(1), a copy of this amendment application is being provided to the designated Missouri State official.

If there are any questions, please contact Mr. Tom Elwood at 314-225-1905.

I declare under penalty of perjury that the foregoing is true and correct.

Sincerely,

Brent Jungmann
Sr. Director, Nuclear Engineering
