Date: Friday, July 8, 2022 5:06:05 PM

Osiris,

Thanks for keeping me posted. Be aware that, because the timing will coincide with the finalization of the NTR license renewal, I may need more than 30 days to respond to any additional RAIs.

Dave

Dave:

Good afternoon!

Just wanted to let you know that this morning I was informed that, due to resource constraints (mainly criticality and health physics reviews) and other priorities in our Division, our response on GEH's amendment request to incorporate edits to the 2015 and 2016 applications will be delayed. Based on this, and adjustment to the review schedule puts issuance of our response by October. We will try to do our best to have it earlier and I'll let you know closer to then. Also please note that there could be some changes regarding the total costs for reviewing the request that we provided in the acceptance letter but I do not expect these to be major.

Please receive my apologies for this inconvenience and let me know if you have any questions.

Osiris
