LISLE, IL 60532-4352

August 15, 2022

David M. Jones
Construction Inspector Superintendent
Missouri Department of Conservation
2901 W. Truman Blvd.
P.O. Box 180
Jefferson, MO 65102

Dear Mr. Jones:

Enclosed is Amendment No. 12 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-20298-01 in accordance with your request dated June 10, 2022.

Your license is amended to reflect the following changes:

- increase the license authorization to allow for possession and use of additional Humboldt Scientific, Inc., Model 5001 portable gauging devices; and
- remove the reference to the Troxler Electronic Laboratories Model 3411B portable gauging device as this model is included with the Troxler Electronic Laboratories Model 3400 Series portable gauging devices for licensing purposes.

In addition, I updated the text of the license conditions throughout your license to align with the U.S. NRC's [Standard License Conditions](#) format. This includes the addition of a three-year record retention requirement applicable to records of individuals designated as users and records of physical inventories.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, you may notify the U.S. NRC Region III office at (630) 829-9887 so that appropriate corrections and answers may be provided.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

You will be periodically inspected by the U.S. NRC. Failure to conduct your program in accordance with the U.S. NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with the U.S. NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for U.S. NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with U.S. NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which the U.S. NRC expects of its licensees.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

D. Jones

-2-

The U.S. NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on U.S. NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in U.S. NRC-regulated activities.

U.S. NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the U.S. NRC's electronic document system. Pursuant to U.S. NRC's RIS 2005-31 and in accordance with 10 CFR §2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the U.S. NRC website at: <https://www.nrc.gov/docs/ML1619/ML16196A237.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <https://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

In accordance with 10 CFR §2.390 of NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M. Kelly, MPH
