

NRC FORM 591M
10 CFR 2.201

U.S. NUCLEAR REGULATORY COMMISSION

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED:

Geo-Engineering & Testing, Inc.
187 Perez Coral Road
Barrigada, Guam
REPORT NO.: 2022-001

2. NRC/REGIONAL OFFICE

U.S. Nuclear Regulatory Commission
Region IV, 1600 East Lamar Blvd.
Arlington, Texas 76011-4511

3. DOCKET NUMBER

030-36590

4. LICENSE NUMBER

56-18173-02

5. DATE(S) OF INSPECTION

August 1-3, 2022

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- ☐ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☐ 3. The violations(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.
- ☐ Non-Cited Violation(s) was/were discussed involving the following requirement(s):
- ☒ 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with the NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.

10 CFR 20.1101(c) requires that the licensee shall periodically (at least annually) review the radiation protection program content and implementation.

Contrary to the above, from August 2019 to August 1, 2022, the licensee failed to periodically (at least annually) review the radiation protection program content and implementation. Specifically, the licensee had not performed a review of the radiation protection program since at least August 2019, exceeding the annual periodicity. (Policy Example 6.3.d)

To correct the violation the licensee committed to perform a review within 30 days of the inspection and would create a tracking mechanism (e.g., calendar reminders) to ensure the radiation protection program was reviewed at least annually.

[Additional location inspected: Walumwo St. (2 blocks from Middle Rd) Garapan, Saipan, CNMI]

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.
