Mr. Vollmer,

I apologize for getting back to you so late, but I have had to do a lot of research on this very old action. It goes back to 2007 when a request to increase the amount of carbon-14 was submitted, doubling the amount that was on the license then, and still on the license now. The reviewer at the time requested that you submit a new financial assurance cost estimate for the increased amount of carbon-14, which you provided in 2008. In December 2013, the reviewer then requested assistance from our program office in determining if the cost estimate was sufficient; that assistance was provided in March of 2014.

Nothing has been done with this request to increase C14 and provide new financial assurance for it since then.

You have had a large number of amendments since that time, and no changes have been made in the amount of carbon-14. Do you still intend to increase that limit?

- If not, please withdraw the 2007 request to increase the amount of carbon-14, and I can close this action.
- If so, please let me know and we will continue the review.

Subject: financial assurance DFP update needed

Mr. Vollmer,

I am a Region I license reviewer temporarily assigned to work on some Region 3 actions. This is a very old financial assurance action, which likely is outdated. In addition, NRC requires that any decommissioning funding plan (DFP), that is the basis for the cost estimate for financial assurance, be revised every 3 years and at the time of renewal. Your DFP has not been revised since 2007.

Please review the attached letter and provide a revised DFP. If you have any questions, feel free to reach out to me – email or cell phone is best.
