Subject: [External_Sender] Report referenced in draft Kairos EIS

Hello Tamzen,

Could you please send link to Kairos 2021-TN7880 document? It is referenced throughout the draft EIS document: **Environmental Impact Statement for the Construction Permit for the Kairos Hermes Test Reactor - Draft Report for Comment**

<https://www.nrc.gov/docs/ML2225/ML22259A126.pdf>

Of particular interest / concern is the plan for disposition of the Fluoride salt waste (and TRISO fuel pellets).

I have been unable to find information on the current location and disposition of waste from the five SFR fast breeder reactors referenced in slides 12-15.

<https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML22262A252>

Could you please send information on the current location and disposition of the sodium waste from these reactors as well as the Oakridge SMRE.

Certainly, viable plans for the long lived radioactive waste must be thoroughly evaluated in NRC review and EIS for the proposed test reactor..

Thank you
Kalene Walker
