

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

December 15, 2022

Mr. Daniel G. Stoddard
Senior Vice President and
Chief Nuclear Officer
Innsbrook Technical Center
5000 Dominion Blvd
Glen Allen, VA 23060-6711

SUBJECT: REVISION OF SCHEDULE FOR THE CONDUCT OF ENVIRONMENTAL
REVIEW OF THE NORTH ANNA POWER STATION SUBSEQUENT
LICENSE RENEWAL APPLICATION (EPID NUMBER: L-2020-SLE-0000)
(DOCKET NUMBERS: 50-338 AND 50-339)

Dear Daniel Stoddard:

By letter dated August 24, 2020, Virginia Electric & Power Company, doing business as Dominion Energy Virginia (Dominion) submitted a subsequent license renewal application (SLRA) pursuant to title 10 of the *Code of Federal Regulations* part 54 (10 CFR), to renew operating licenses NPF-4 and NPF-7 for the North Anna Power Station (North Anna), Units 1 and 2, for review by the U.S. Nuclear Regulatory Commission (NRC or the staff). This letter is to inform you about a schedule change in the North Anna subsequent license renewal review.

In February 2022, the NRC revised the North Anna review schedule showing future milestone dates as "to be determined" to allow the staff to determine the impacts of Commission Orders CLI-22-02 and CLI-22-03 on the North Anna project schedule.

In August 2022, Dominion submitted its SLRA annual update. In September 2022, in response to the Commission Orders, Dominion submitted its SLRA, appendix E (Environmental Report), Supplement 1. The NRC has completed its evaluation of impacts on the North Anna project schedule. The enclosed schedule has been updated to reflect future project milestones. The estimated staff hours to support the enclosed schedule is 5,080 hours.

If you have any questions on the revised schedule, please contact Manny Sayoc or Tam Tran by telephone at 301-415-4084 or 301-415-3617 or by email at Emmanuel.Sayoc@nrc.gov or Tam.Tran@nrc.gov.

Sincerely,

Signed by Regan, Christopher
on 12/15/22

Christopher M. Regan, Division Director
Division of Rulemaking, Environmental,
and Financial Support
Office of Nuclear Material Safety
and Safeguards
