SUBJECT: REQUEST TO THE OAK RIDGE PUBLIC LIBRARY TO MAINTAIN A COPY OF THE ENVIRONMENTAL REPORT FROM TRISO-X, LLC'S APPLICATION FOR A SPECIAL NUCLEAR MATERIAL LICENSE TO MANUFACTURE FUEL AT A FABRICATION FACILITY IN OAK RIDGE, TENNESSEE (DOCKET NUMBER: 70-7027)

Dear Michael Stallo:

The U.S. Nuclear Regulatory Commission (NRC) received a license application from TRISO-X, LLC (TRISO-X) for a special nuclear material license for possession and use at a fuel fabrication facility (FFF) in Oak Ridge, TN. TRISO-X seeks to manufacture fuels for existing commercial reactors and high assay low enriched uranium to support advanced reactors.

We are reaching out to the Oak Ridge Public Library to request its assistance in establishing an information repository and maintaining reference documents at the library. The documents are associated with the NRC's environmental review of the TRISO-X FFF license application.

As part of the review of TRISO-X's request, the NRC will make available to the public various documents regarding the project and the NRC's review process. This letter transmits a hard copy of the Environmental Report. Electronic versions of these documents and the entire application are available in the NRC's Agencywide Documents Access and Management System, accessible via the internet at <http://www.nrc.gov/reading-rm/adams.html> using ML22266A269. In addition, application materials may be accessed at the NRC webpage: <https://www.nrc.gov/info-finder/fc/triso-x>.

We are kindly requesting that copies of all documents on file be kept at the library for a period of three (3) years, if possible, for the public's use. Additional documents will be sent to you as they become available.

We appreciate your willingness to assist the public in participating in the NRC's environmental review process. If you have any questions, please contact Jill Caverly at 301-415-7674, or by email at Jill.Caverly@nrc.gov.

Sincerely,
