Re: Annual Americium Export Report

Dear Director:

The enclosed report is provided in accordance with the requirements of 10 CFR 110.54(b). Troxler Electronic Laboratories manufactures and distributes nuclear gauges that contain americium-241 in the form of sealed sources. The intended use of these gauges is for the measurement of material properties (e.g. moisture content). All export shipments of gauges containing americium-241 during the previous calendar year are listed below.

This year, the report has two sections as Troxler Electronic Laboratories updated their Resource Planning software, so the reports were generated using two software platforms.

If you have any questions, please feel free to contact me at (919) 485-2228.

Sincerely,

Henry E. Barnes
Corporate Radiation Safety Officer
